

ANTENNA MAX

Maximum Flexibility, Maximum Gain
Outdoor Cellular / GPS Antenna + Enclosure

Maximum Gain: Up to 6.6dBi

Worried about cable loss?

Minimize cable loss by installing your router directly into the antenna enclosure.

Retain maximum signal gain by connecting the Antenna Max to the rest of your network with an ethernet cable.

Achieve Near 0dB cable loss

by eliminating RF cables from your setup.

Switch

Client devices

5m RF cable 5dB+ cable loss

A 5m RF cable could lead to nearly complete signal loss on higher frequencies (2100MHz+)

Router

Conventional Antenna

Maximum Durability

UV-resistant plastic enclosure resists moisture, water intrusion, salt spray and corrosion.

Maximum Flexibility

Mix-and-match the antenna with many routers including:

BR1 Mini Series ¹

Transit Duo Pro ²

BR1 Pro 5G ² / CAT20 ²

POTS Adapter ²

¹ BR1 Mini series: BR1 Mini, BR1 Mini Core, BR1 Mini 5G, BR1 Mini M2M.

² For certain products which do not support PoE In, a PoE Splitter is required.

Installation Recommendation

Position Router

Make sure you align the router with the placement mark on the silkscreen.

Silkscreen

BR1 Pro 5G

Transit Duo Pro

BR1 Mini Series

Install Router

Tighten the screws securely into the corresponding router's mounting holes.

Installation Recommendation

Connect Cables to Router

Align the **Wi-Fi**, **LTE** and **GPS** SMA cables with the corresponding ports on the router. Tighten the connector into the port securely in place.

Ethernet Cable

Step 1

Use a cable stripper to remove the RJ45 connector and expose the individual wires.

Step 2

Ethernet cable can be connected via the bottom or side cable gland on the device.

For any unused hole, use an **ethernet hole plug** to securely seal it.

Note: Be sure not to use excessive force when removing the connector as it is delicate.

Installation Recommendation

Attach Bottom Cover

Align the bottom cover with the top cover, secure it in place, and then tighten the screws.

Install PoE Splitter

While some routers may not support Power over Ethernet (PoE) input, Peplink PoE splitter can be used to provide power to these devices.
